

Great dancers are not great because of their technique; they are great because of their passion.

Miss Mindy's Dance Education Philosophy

The benefits of dance go far beyond great feet and perfect form. They extend into emotional development, academic achievement and improved physical health.

In order to gain as much as possible from these benefits Footworkz was founded on the belief the learning and experiencing dance should be fun.

Children like everyone, learn better when the education experience is enjoyable and without undue stress. That is why at Footworkz we focus on encouragement and fun rather than any strict regiment of "proper form."

At Footworkz, we concentrate on encouraging our students to learn without the stress of competition or constantly focusing on what they do wrong instead of what they do right. Our goal is for our students to learn first the basics of how to move in the dance style they are studying and more importantly, turn this fun experience into an overall appreciation of the art of dance.

Announcements!

Dan and I are thrilled to announce ~ we are expecting our first child! I am due July 20th and for this reason I will not be teaching during the summer. I do hope to begin teaching again in the fall.
